

Thomas Daley

Software Engineer

EXPERIENCE

Software Engineer | Naq

June 2023 - Present

- Led the design and implementation of a reusable component system using Storybook, improving UI consistency and accelerating development across the platform
- Designed and built a custom Notion-style document editor using TipTap with bespoke node structures, saving the business significant subscription costs
- Developed complex frontend features using React and Angular, focusing on performance, scalability and maintainability
- Designed and implemented RESTful API endpoints using ASP.NET Core and Entity Framework, including data modelling, validation and integration with PostgreSQL
- Contributed to deployment workflows and infrastructure on AWS using GitHub Actions

Technical Services Engineer | Ciphre

Sept 2022 - June 2023

- Built and customised HR/recruitment system interfaces using HTML, CSS and JavaScript in a production environment
- Developed dynamic notifications and backend configurations using SQL and internal tooling

Front End Developer Placement | Dark Blue

June 2022 - Sept 2022

- Delivered frontend features and bug fixes across multiple client projects
- Worked with Next.js, JavaScript, HTML, SCSS, and Git to ship production-ready code

Implementation Manager | Gorillas

July 2021 - May 2022, London

- Built dashboards and reporting systems using Excel, Tableau, and Mixpanel
- Improved operational processes and implemented warehouse initiatives including an inventory app

Warehouse Manager | Allplants

April 2019 - July 2021, London

- Managed warehouse operations and team, improving efficiency by 8%

Open to remote and contract opportunities (UK/EU/global)

SKILLS

Core:

React, TypeScript, ASP.NET Core, SQL

Frontend:

Angular, Tailwind, CSS, Storybook

Backend:

Entity Framework, PostgreSQL, Node.js

Tools:

Git, AWS, Jest, Vitest

PROFILE

Frontend-leaning full-stack engineer with 4+ years experience building and shipping production applications using React, Angular and .NET.

Experienced in designing scalable UI systems, developing backend APIs, and delivering complex product features across the stack in fast-moving teams.

Comfortable working independently in remote environments, with a focus on building maintainable systems and solving real product problems end-to-end.

EDUCATION

AWS Cloud Practitioner

March 2026, Online

BrainStation | Diploma, Web Development

April 2022 - July 2022, Online

The University Of Leeds | BA Music Degree Classification 2:1

Sept 2009 - July 2012, Leeds
